Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The audit visit portion of the PREA Audit of the Normative Services, INC. (NSI) was held on July 9-11, 2019.

An initial meeting was held with Gary Flohr, Facility CEO, Samantha Tribble, PCM, Chad Lobdell, Admissions coordinator, Ken Faulkhimer, Group Living Director, Jim Larson, Quality Assurance Manager, Jeff Johnson, Clinical Director. The logistics of the audit visit were discussed, including coordinating interviews, tours and other meetings.

A tour of the entire facility was conducted following the initial meeting. All 6 dorms were toured, as well as the administration building, outbuildings, gym, cafeteria, etc. As the facility has various programs with animals, several barns were toured. The dorms, in order, were Willowbrook, Big Goose, Brayton, Eagle Ridge, Hillside, Mountain View, and Riverside. The Hillside dorm is currently being remodeled and does not have residents at the present time, but the education part of the building is still used. The dorms follow a common theme, with sleeping rooms, common areas, educational areas. Supervision was observed to be very satisfactory, with staff watching all activities.

Along with dorms, the gym/cafeteria and several outbuildings/barns were visited. The facility raises goats, horses, cows, sheep and pigs as part of their rehab program.

After the tour, interviews started. Residents from all dorms were selected, and a total of 22 resident interviews were conducted. There were also three residents who reported sexual abuse who were interviewed, one that identified as being transgender, one that had reported prior abuse and one that identified as lesbian for targeted interviews with the appropriate interview protocols. During the interviews, one resident related to me that there was another young man that was making comments of a sexual nature to other residents on the dorm. Immediately after that interview, I reported to Jim Larson.

Staff were also interviewed during the visit. Staff from all dorms were selected, as well as all shifts. On the first day of the visit, I returned to the facility from 2230-2345 for interviews with the on-coming overnight shift, where 4 staff were interviewed. Included in the interviews were the HR director, medical staff, mental health staff, the PREA Compliance Manager, the Deputy Director/Clinical Director, the Executive Director, the Admissions Manager, and Quality Assurance Specialist. A total of 16 staff interviews were conducted.

A report-out meeting was held on the final day of the visit. In attendance were: Samantha Tribble, Ken Faulkner, Margaret Sare, Gary Flohr, Barbara Talmadge, Jim Larson, and Chala Hurst.

Several policies were discussed which needed editing, however, the policies were mainly administrative policies that could be edited with no impact on staff operations. These will be edited and released to management staff.

The facility does have a lot of things in place that comply with PREA. The rules and practices at NSI certainly safeguard the residents' privacy, and all residents interviewed stated that they had the ability to shower, dress or use the restrooms without staff viewing them.

Searches are definitely done within the guidelines of the PREA standards. Cross-gender searches are never conducted, nor are any type of strip searches conducted. The manner in which the Sequel programs train staff to do all searches is compliant with 115.315f.

The biggest concern that I had, which was covered extensively at the report out meeting, was the lack of training for staff. Out of the line staff interviews conducted, at least four did not know what PREA was. Others had heard of it, but had no training related to sexual abuse or sexual harassment. Still others had been given some type of packet, but the training had been cancelled. Almost all line staff were given an hypothetical situation during the interviews involving sexual abuse by another resident. None of the staff interviewed were able to give more than one of the first responder duties. The only first responder duty that most of the staff did get correct was 115.364 A 1, to separate the individuals. After that, the common answer was to call the Group Living Director or other supervisory staff. Most staff knew mandatory reporting laws, but it is suggested that this training be strengthened.

The NSI management was informed during this report-out meeting, that due to the lack of training on PREA prior to this initial audit visit, I had made the decision that I would need to return to the campus at a later date to interview staff again. In the past, with other facilities, where one or two aspects of training had been substandard, I had conducted phone interviews to ascertain mastery after training had been conducted. However, there would be no possible way to conduct full interviews with a large number of staff over the phone, and therefore I would be returning to the campus for interviews.

On February 11-12, 2020, I revisited the facility with the goal to interview a large number of staff to ascertain whether the facility had trained staff adequately during the corrective action period. I arrived on Feb 11 and met with administration staff members and reiterated that the only thing that I had to be satisfied with was the training of staff members. After the meeting, the staff that had been selected started to arrive to be interviewed. I also reported to the facility late in the evening on Feb 11 to interview overnight staff.

In all, 19 staff members were interviewed over the course of the two days that I was on-site. It was apparent that the staff interviewed had been trained further on PREA topics. Through the interviews, I asked for clarification and/or details regarding the topics listed in 115.331. I also continued to use hypothetical situations to test staff's knowledge and understanding of the first responder duties outlined in 115.364a. I was satisfied that the training had occurred and that staff were much more knowledgeable regarding PREA than they were during the first audit visit.

The one thing that I did not find at the second visit were the proper training records from all of the training that had been done since the first visit. I gave the facility two options; 1) find the proper documentation and forward it to me, or 2) conduct a refresher training before March 1, 2020 (The end of the corrective action period and forward me the correct documentation. A combination of the two options was done. The facility did furnish me with training documentation for every staff member, some of which has been submitted prior to the second visit, and some that had to be done via refresher training conducted during the end of February. Seven staff members were trained during a catch-up session on March, 4, and documentation was forwarded to me. As this was a small percentage of the staff, I still find the facility to be significantly compliant with the standard

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

NSI Academy was founded in 1991 in Sheridan, Wyoming as a private, non-profit program offering residential treatment and educational services to Wyoming's adolescents with behavioral and emotional problems. The program is located in the foothills of the Big Horn Mountains in Sheridan, Wyoming on a campus of over 300 acres. We serve male and female students ranging from ages ten to seventeen. We strive to provide our students with a caring high school environment, to include a traditional school day with after school extracurricular activities and athletic program, to allow them to more easily transition back to their own community/school. We have a dedicated, qualified staff, many of whom have been with NSI for years. Rather than a "secure/lock down" campus, NSI Academy is a "staff-secure" facility and provides 24/7 supervision to ensure the safety and security of our students. Our belief in our students' abilities, potential, and capacity to thrive and excel in a safe and challenging environment grows stronger each year.

We have six main residential sites on our large, rural campus. Four are for males and two for females. Each modern, well maintained residence is developed to look and feel as much like a family home as possible. Each residence has staff members who are assigned only to that site, with staff working on shifts throughout the 24-hour day. This provides for the development of a close personal "home team" at each site, with ample backup and input from other teams to form a solid, caring community. In addition to the team at each residence, NSI has a large support staff that-regularly interacts with the house teams to provide all of the needed services to meet our students' needs

NSI's mission is to facilitate positive and lasting behavioral changes with a student population of high-risk adolescents, helping them to learn to live safely and productively outside the structure of the residential care setting. Staff, students, and families work together to ensure a positive normative culture while using trauma informed care as our primary therapeutic tool to promote norms of physical and emotional safety, mutual respect, confrontation of inappropriate behavior, and commitment to group and individual goals.

Treatment Programs Offered

Boys Residential Program

This is a high structured, staff-driven approach for male youth in need of out-of-home placement. The average length of stay is 9-12 months. The program's goal is to prepare young men for a positive future by identifying strengths and weaknesses through; individual, group, and family therapy and daily assessments. Once identified, staff and students work together to enhance the student's positive qualities and promote social change through normative culture influence.

Girls Residential Program

This program provides a safe, supportive, nurturing and educational approach for young women. Also a 9-12 month program, it is highly structured and staff-driven to facilitate helping young women to confront delinquent behaviors, while assisting them to process the impact that physical, emotional, and sexual abuse may have had on their lives. They learn to develop healthy relationships and build self-esteem in a compassionate environment, laying foundations for a positive future.

The Chemical Dependency program is licensed by the Wyoming Department of Health, for Level III.1 adolescent treatment as well as III.5 as defined by the American Society of Addiction Medicine (ASAM). The facility's staffing ration is stricter than 1:8. Facility policy "Student/Staff Ratios" mandates 1:6 and 1:10 during sleeping hours. However, those residents that are under contract from the State of California is 1:4 during waking hours. There are several staff members who live on site in facility-owned housing that can be activated on short notice to maintain ratios, as well as staff that will stay over after their shift to keep ratios within policy.

The agency-wide PREA Coordinator has been consulted with regards to the staffing plan and its annual review. The facility does not have any deviations from the staffing ratio.

Unannounced rounds are being conducted on all shifts. Overnight supervisor was one of the selected interviews and it was confirmed that the rounds are being conducted. Documentation was observed.

Auditor Overall Compliance Determination

- Exceeds Standard** (*Substantially exceeds requirement of standards*)
- Meets Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)
- Does Not Meet Standard** (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The facility prohibits all strip searches. This is uniform throughout all Sequel facilities, as far as this auditor is aware.

Pat Searches are usually only allowed in extreme circumstances and must be approved by the Group Living Director. Even in these circumstances, there are no cross-gender searches ever allowed. Also, policy requires that two staff members of the same gender of the student be present during the search.

The method of routine personal searches most commonly used in the facility is unique and meets all PREA Standard requirements. Mostly, the resident is requested to remove outer items such as coats or jackets, and empty pockets. The student then shows the staff member the inside of pockets, waistline of pants, untuck shirt, lift pant legs, take off shoes, etc. Except in unusual circumstances, hands-on searches are not done. Even so, searches are only done by same sex staff. The staff are well trained on this, and this training meets the requirements of Standard 115.315f.

No searches or physical examinations are allowed to determine the genital status of any resident.

In interviews with staff and residents, it was confirmed that most staff of the opposite gender announce their presence when entering a dorm area. There were a couple of residents that said they do not hear it every time, but this seemed to be an anomaly. The facility will continue to require staff to make the cross-gender supervision announcement and train all staff in doing so as a refresher.

Standard 115.316: Residents with disabilities and residents who are limited English proficient

Auditor Overall Compliance Determination

- Exceeds Standard** (*Substantially exceeds requirement of standards*)
- Meets Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)
- Does Not Meet Standard** (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The biggest concern that I had with the audit at NSI, which was covered extensively at the report out meeting, was the lack of training for staff. Out of the line staff interviews conducted, at least four did not know what PREA was. Others had heard of it, but had no training related to sexual abuse or sexual harassment. Still others had been given some type of packet, but the training had been cancelled. Almost all line staff were given an hypothetical situation during the interviews involving sexual abuse by another resident. None of the staff interviewed were able to give more than one of the first responder duties. The only first responder duty that most of the staff did get correct was 115.364 A 1, to separate the individuals. After that, the common answer was to call the Group Living Director or other supervisory staff. Most staff knew mandatory reporting laws, but it is suggested that this training be strengthened.

The NSI management was informed during this report-out meeting, that due to the lack of training on PREA prior to this initial audit visit, I had made the decision that I would need to return to the campus at a later date to interview staff and review training records. In the past, with other facilities, where one or two aspects of training had been substandard, I had conducted phone interviews to ascertain mastery after training had been conducted. However, there would be no possible way to conduct full interviews with a large number of staff over the phone, and therefore I would be returning to the campus for interviews. ‘

REQUIRED ACTION: Train all staff on all 11 topics required in standard 115.331a, with special emphasis on first responder duties. Keep documentation which meets standard 115.331d. Furnish all training records to the auditor in a timely fashion. Facilitate the return of the auditor to interviews a significant number of staff prior to the end of the corrective action period.

Training materials have been furnished to the facility that is compliant with the PREA Staff Training Standard 115.331.

During the corrective action period, the facility conducted training for all employees. On February 11-12, 2020, I revisited the facility with the goal to interview a large number of staff to ascertain whether the facility had trained staff adequately during the corrective action period. I arrived on Feb 11 and met with administration staff members and reiterated that the only thing that I had to be satisfied with was the training of staff members. After the meeting, the staff that had been selected started to arrive to be interviewed.

In all, 19 staff members were interviewed over the course of the two days that I was on-site. It was apparent that the staff interviewed had been trained further on PREA topics. Through the interviews, I asked for clarification and/or details regarding the topics listed in 115.331. I also continued to use hypothetical situations to test staff's knowledge and understanding of the first responder duties outlined in 115.364a. I was satisfied that the training had occurred and that staff were much more knowledgeable regarding PREA than they were during the first audit visit.

The one thing that I did not find at the second visit were the proper training records from all of the training that had been done since the first visit. I gave the facility two options; 1) find the proper documentation and forward it to me, or 2) conduct a refresher training before March 1, 2020 (The end of the corrective action period and forward me the correct documentation. A combination of the two options was done. The facility did furnish me with training documentation for every staff member, some of which has been submitted prior to the second visit, and some that had to be done via refresher training conducted during the end of February. Seven staff members were trained during a catch-up session on March, 4, and documentation was forwarded to me. As this was a small percentage of the staff, I still find the facility to be significantly compliant with the standard.

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The facility has a grievance process that meets all requirements of standard 115.352. The grievance process is further enhanced by the participation of the outside agency, the Advocacy and Resource Center (ARC) in the handling of their grievances. This novel approach will resemble a resource that would act as an ombudsman-type agency to assist the facility.

Time periods are met, and there is no requirement to use an informal process. The residents are able to submit the grievances to staff other than the staff that may be the subject of the grievance. Also, grievances are not referred to the staff who is the subject of the grievance. In the case of emergency grievances, or in any situation in which a resident might be subject to imminent danger of sexual (or any) abuse, all staff knew that they could immediately separate residents to ensure safety. This focus on safety is very strong and staff knew that they did not have to wait for permission or authorization to act in behalf of the residents.

All requirements of 115.376 are found in facility policy. Interview with the H.R. director confirmed that the policy is being followed.

The PAQ reported that one staff had been terminated due to sexual harassment concerns, but this termination was a result of staff-staff hostile work environment and not a PREA issue. However, it is a fairly good indicator that staff would be properly disciplined in the event of a PREA issue.

Mental Health therapists are consulted for any sanctions, which enables the facility to consider the resident's mental health and mental illness status when determining sanctions for violations of any rules.

Sanctions imposed would be commensurate with those sanctions that have been imposed for similar circumstances. However, no sanctions would be imposed without a criminal finding of guilt or an administrative finding that sexual abuse did occur.

Nothing that resembles isolation is used by the facility. Since the facility is a contract facility, there perhaps would be severe cases in which the student would be removed from the program and the contracting agency would make other arrangements for treatment and placement.
